Integrated Dynamic Reporting System for Accounting, Management, and Administrative Applications enables the system to generate reports on the fly by providing step-by-step dialogs that follow a user-guided report creation process.$189.00 The intuitive and easy-to-use interface allows business users to develop rich reports and presentations. It uses the Visual Reports Wizard, which allows users to create reports by dragging and dropping objects and images from the library and follows a wizard-like report development process.$169.00 In addition, users can develop rich reports for administrative purposes such as invoicing, sales, and inventory management, or create complex tasks such as database querying or calculation of multiple values.$119.00 Database Query Builder - Windows/Mac Database Query Builder - Web Server The Database Query Builder allows users to generate SQL queries for data displayed in a Web user interface. Simply select a predefined report from the list of predefined reports or the user can create a new report of his choice. The wizard guides the user step by step through the entire 82157476af
